Table of Contents

Abstract ..... **ix**

Preface ..... **x**
Statement of Contribution x
Acknowledgements xi

Chapter 1: Introduction **1**
Thesis Contributions 8
Thesis Structure 9

Chapter 2: Motivation **11**
Specification Paradigms Across Lifecycle 12
Requirements *13*
Object-Oriented Analysis and Design *16*
Object-Oriented Implementation *18*
Comparison *18*
Example: Software Engineering Environment 19
Requirements Specification *19*
Supported Grammar for Expressions *20*
Expressions as Abstract Syntax Trees *20*
SEE System Design, Version 1.0 22
Product Flexibility *26*
Comprehensibility *27*
Managerial *28*
Conclusion *29*
Evolving the SEE System Design 29
New Requirements *29*
Extending Version 1.0 directly *30*
Using Design Patterns *30*
Assessing Design Patterns *32*
Summary *34*
Drawing Conclusions for a Solution 34
Chapter Summary 35

Chapter 3: Related Work **37**
Requirements Engineering Models 38
Viewpoints and Perspectives *38*
Use Cases *40*
Features *41*
Services and Facilities *42*
Object-Oriented Analysis and Design Models 42
Unified Modeling Language (UML) *42*

Role Modeling (OORam) *43*
Catalysis *44*
Role Modelling (Kristensen) *45*
Contracts *45*
Views *46*
Design Patterns *47*
Object-Oriented Programming Models 48
Subject-Oriented Programming *48*
Aspect-Oriented Programming *49*
Composition Filters *50*
Adaptive Software *51*
Metaobject Protocols *52*
Database Models 53
Discussion 57
Chapter Summary 63

Chapter 4: Composition of OO Designs: The Model 64
Decomposing Design Models 65
Structural Matching with Requirements *66*
Overlapping Subjects *70*
Composing Design Models 71
What does a Subject look like? *72*
Composing Design Subjects *75*
Deferring Subject Composition *78*
Specifying Composition 78
Specifying Inputs *79*
Identifying Corresponding Elements *80*
Scope of Composition Relationship *83*
Rules for Specifying a Composition Relationship *84*
Integration of Inputs *87*
Override Integration *88*
Merge Integration *91*
Notation *95*
Analysis of the Output of a Composition 95
Forwarding of References *96*
Ill-Formedness of Result *99*
Using Subject-Oriented Design 102
Usefulness throughout Development Process *103*
What Size is a Subject? *104*
Duplication of Effort *104*
How Complex is Composition Specification? *105*
Feature Interaction Problem *106*
Chapter Summary 107

Chapter 5: Composition Relationship: An extension to the UML Metamodel 109
The UML Metamodel 109
Composable Elements 111
Composition Relationship 113
Description of Constructs *113*
Well-Formedness Rules *117*
Semantics for Identifying Corresponding Elements *122*
Semantics for Forwarding References to Composed Elements *123*
Chapter Summary 125

Chapter 6: Override Integration 127
Syntax 128
Well-Formedness Rules 128
Semantics 130
General Semantics 130
Impact of Override on Subjects 132
Impact of Override on Classifiers 134
Impact of Override on Attributes 137
Impact of Override on Operations 139
Impact of Override on Associations and Generalizations 140
Impact of Override on Dependencies 146
Impact of Override on Constraints 146
Impact of Override on Collaborations 148
Chapter Summary 153

Chapter 7: Merge Integration 155
Description 156
Merge as a Simple Union 156
Merge with Corresponding Classes, Attributes 157
Merge with Conflicts in Corresponding Elements 157
Reconciling Conflicts in Corresponding Elements 158
Merge with Corresponding Operations 160
Merge Integration Syntax 164
Merge Integration 165
Reconciliation of Conflicts 165
Collaborations for Merged Operations 167
Well-Formedness Rules 168
Semantics 169
General Semantics 169
Impact of Merge on Subjects 170
Impact of Merge on Classifiers 173
Impact of Merge on Attributes 177
Impact of Merge on Associations and Generalizations 180
Impact of Merge on Dependencies 184
Impact of Merge on Constraints 185
Impact of Merge on Operations 188
Impact of Merge on Collaborations 195
Chapter Summary 196

Chapter 8: Composition Patterns 198
Composition Patterns Model 199
Merge Integration 199
UML Templates 200
Combining the Two: Composition Patterns 200
Composition Pattern Specification 201
Composition Binding Specification 205
Composition Output 207
Composition Patterns Metamodel 209
Well-Formedness Rules 211
Chapter Summary 211

Chapter 9: Applying the Subject-Oriented Design Model 213
SEE System Design, Version 1.0 213
Design Subjects 214

Characteristics of SEE Design Subjects *216*
Composition Relationships for Design Synthesis *218*
Composition Pattern *221*
Producing Code from the Design *222*
Evolving the SEE System Design 222
Chapter Summary 223

Chapter 10: Case Study and Evaluation 225
Requirements Specification 225
Functional Requirements *226*
Technical Requirements *227*
Design with Structural Matching to Requirements 227
Decomposition *228*
Design Subjects *229*
Composition *237*
Evolving the LMS 242
Subjects *243*
Composition *244*
Evaluation 247
Product Flexibility *247*
Comprehensibility *248*
Managerial *248*
Comment *249*
Chapter Summary 250

Chapter 11: Summary, Conclusions and Future Work 251
Summary 251
Future Work 253
Supporting Technologies *253*
Additional Features and Rules *255*
Software Development Process Support *258*
Formal Foundations *258*
Conclusions 259

Bibliography 260

Appendix A: Partial Illustrations of UML Metamodel 269
Package 269
Classifier 270
Attribute 270
Operation 270
Relationship 271
Dependency 271
Constraint 272
Collaboration 272
