Who are Deloitte?

Deloitte is one of the big 4 auditing firms. It provides a wide range of services such as audit, tax, consulting and financial advisory services to clients in various industries.

Deloitte is the worldwide leader in professional services and consulting, creating a global network of 200,000 people in 150 locations.

Work at Deloitte

As part of my internship I joined the Technology Consulting department. Here I am contracted out to a client and experience working on site.

My first assignment was Solution Development and Integration for a long term client The Revenue Commissioners. The Revenue is the primary state body responsible for the assessment and collection of taxes and duties in Ireland.

Life at Deloitte

There is a wide range of social and sporting events within Deloitte to get involved in. From playing soccer to employee event nights with colleagues I’ve really enjoyed the social aspect of Deloitte.

What is Vehicle Registration Tax?

All motor vehicles in the State, other than visitors, must be registered with the Revenue Commissioners. VRT is chargeable on the registration of these motor vehicles.

One way a vehicle can be registered is with the production of a Certificate of Conformity.

Certificate of Conformity (CoC)

A CoC is a statement by the manufacturer that the vehicle conforms to the relevant EU type-approval regulations.

I was a part of the VRT project working specifically on the CoC validation rules. This involved cross field dependencies and type validations.

Here I used familiar languages from college such as Java to implement the rules while learning new tools and technologies like Spring, Tomcat and Maven.
