Student: Tadhg Riordan  Academic Supervisor: Hugh Gibbons

Revenue Managers: Madeline Leddy & Stephen Lennon

**Company**

- The Revenue Commissioners are the Irish Government agency responsible for customs, excise, taxation and related matters.
- Their IT Department is located on Castle View, George’s Street.
- 5,647 full-time staff located in all 26 counties.
- Diverse Workforce
- “To serve the community by fairly and efficiently collecting taxes and duties and implementing Customs controls”

**Projects**

**VAT RTR (Real Time Risk) Enhancements**

- VAT Real Time Risk is an area within Revenue which calculates a customer’s liability for non-compliance of VAT payments.
- I was assigned the job of fixing an existing issue in the VAT RTR system – In Revenue, this type of issue is known as a SIR.

**STTU (Service & Transactions Taxes Unit) Returns**

- I designed the complete front end for two returns which are now going to be available externally on the Revenue On-Line Service and internally on the Integrated Taxation Processing system.
  - These new returns are for Natural Gas Carbon Tax and Solid Fuel Carbon Tax.
- This involves using a number of different technologies, most of which I had little previous experience with, including HTML, CSS, JavaScript and Java Server Pages.

**Revenue File Retrieval System**

This project will be carried out entirely by the 8 Revenue Interns.

It will replace an already existing internal system by more efficiently automating the process of requesting and retrieving Revenue specific files for Revenue employees.

**Technologies**

- CVS
- CSS
- JSP
- HTML
- Spring
- MAVEN
- JS
