The Purpose of the Role:

The School of Computer Science and Statistics at Trinity College Dublin is a collegiate, friendly, and research-intensive centre for academic study and research excellence. The School has been ranked #1 in Ireland, top 25 in Europe, and top 100 Worldwide (QS Subject Rankings 2018, 2019, 2020, 2021).

The School of Computer Science and Statistics is seeking to appoint an Associate Professor in Computer Science, who will join the internationally highly regarded Discipline of Graphics and Vision. The Associate Professor will be a full faculty member, and as such will be expected to innovate in both research and teaching, to assist in the administration and mission of the School and contribute to the wider research community. The appointee should be a well-established researcher in the field of Computer Vision or another closely related area, with an internationally recognized research programme. The successful candidate will be expected to contribute to undergraduate and/or postgraduate teaching in the School, particularly in Computer Vision, Augmented Reality and related areas. The appointee will also be expected to build an internationally recognised research team and supervise doctoral students.

Context:

Applications are encouraged from candidates with expertise in Computer Vision and closely related areas, including but not limited to: Image Processing, Computational Photography, Pattern Recognition,
Augmented Reality, Virtual Reality, Holography, 3D Multimodal Interfaces and Machine Learning for Vision.

The successful candidate will be able to evidence excellence in both research and lecturing, have a strong international research track record and evidence of research leadership. They should have a strong commitment to research-led undergraduate and postgraduate teaching and a demonstrated capacity/potential to attract research funding and develop a world-class research programme. Evidence of research supervision of doctoral students is also expected.

**Main Responsibilities:**

**Research:**

The appointee should demonstrate that they are a *thought leader* and a *researcher of repute* within their chosen research area. As part of their research duties, the appointee is *required* to engage in research and/or other creative and innovative activity as appropriate to the Discipline. The appointee is required to disseminate their research in *high impact academic publications*: journals, conferences, or other outlets as appropriate. The appointee is required to actively pursue initiatives by which to seek/secure funding for research in their own field and/or interdisciplinary or multidisciplinary research as appropriate. The appointee is also required to participate in postgraduate research supervision including student recruitment, thesis definition, preparation, advice and regular advisory and guidance meetings.

**Teaching:**

As part of normal teaching duties, the appointee is obliged to give instruction and supervision, as directed by the Head of School (or designated Head of Discipline), to undergraduate and postgraduate students of the University in courses and programmes organised by the School. It is expected that the appointee will be responsible for delivering teaching in Computer Vision and related modules such as Augmented Reality, as well as introductory topics in Computer Science.

Such duties include curriculum and course design, preparation and delivery of lectures, tutorials and general examination and other assessment duties. The appointee is also required to be available to students for academic guidance and advice. In some disciplines, academic activities may also include laboratory, workshop or clinical instruction, supervision of fieldwork, site visits and other off-campus activities.
Contribution and Scholarly Activity:
As part of the contribution to the School and University, the appointee is required to participate in academic administration at School level (as directed by the Head of School), and/or University level. In representing the University externally, the appointee is required to maintain the highest professional standards. The appointee is also required to commit to engage in scholarly activity such as, but not limited to, refereeing for journals, external examining, membership of learned societies, advisory bodies and peer review panels.

Person Requirements
The role-holder will require the following knowledge, skills and attributes for successful performance in the role:

Qualifications
- The successful candidate must have a PhD in Computer Science or a related discipline.

Knowledge and Experience:
The successful candidate will be expected to clearly demonstrate the following:

Research:
Essential:
- Proven record in research publication, supervision, and an ability to contribute to the field of Computer Vision and other closely related topics.
- Demonstrate research plans that complement the strategic plans of the School of Computer Science and Statistics.
- Evidence of a sustained record of high-quality research and publication in their field.
- Experience of recruiting and supervising research postgraduate students.
- Participation in research conferences and seminars.
- Ability to engage in research collaboration with industry and across disciplines.
- Demonstrated ability to secure competitive research funding.
- Demonstrated ability to lead and oversee research projects.
• Evidence of research collaboration with industry, society and universities.

Teaching

Essential:
• Ability to provide lectures and practical classes in Computer Science to undergraduate and postgraduate students.
• Evidence of a personal commitment to excellence in teaching.
• Excellent communication and interpersonal skills.
• Experience of supervising undergraduate and postgraduate dissertations.
• Experience of supervising Ph.D Thesis/Theses
• Experience of developing new modules and teaching material.

Desirable:
• Experience of using innovative teaching methods.
• Evidence of high-quality teaching.
• Experience of working collaboratively and effectively in an inter and multidisciplinary environment.

Engagement with the Discipline/Society

Desirable:
• Experience of reviewing papers for scholarly journals and conferences.
• Experience of organizing scholarly events.
• Experience of engagement with the public on matters of research or education.
• Experience of contributing to the wider work of a university or research institution.

Expected Skills and Competencies
• Career driven, enthusiastic and highly motivated.
• Excellent communication skills.
• Good organizational skills.
• Strong leadership skills.
• Ability to work effectively as member of a team.
• Honesty and integrity.
• Ability to be flexible when necessary.
• Willingness to contribute to the Discipline, School, College and the wider community.
• Ability to take the initiative.
• A commitment to own professional development.

In addition, candidates will be assessed on their potential contribution to the School, College and the wider community.

Application Information
Applicants should provide the following information:

1. A comprehensive curriculum vitae, including a full list of publications.
2. The names and contact details (i.e. addresses, e-mail, etc.) of three referees.
3. A research plan summarising research to be carried out in the next two years and including sources of funding – max 2 pages.

PLEASE NOTE: Candidates who do not submit this additional information may not be considered for shortlisting

Candidates should note that the interview process for this appointment will include the delivery of a presentation to the School.

Further Information for Applicants
For further information about the School of Computer Science and Statistics, see: https://www.scss.tcd.ie/
